business to business

# OUR SERVICES

## SPACE PLANNING

We have a fully trained 2D space planner and 3D visual artists. We pride ourselves on our open and friendly approach to the design process. From the initial consultation, we use our industry expertise to recommend products to suit your design & budget specifications. With 2D design drawings we can bring both traditional and contemporary office designs to life.

## PROCESS FOR MEDIUM & LARGE OFFICE

Clients with medium and larger offices often have architectural plans available in either PDF OR DWG / AutoCAD formats. These are the ideal point for us to start designing your new workspace. Please email the relevant files to us. Alternatively make an appointment with one of our trained representatives who can perform a full site survey and discuss your requirements in depth.

## PROCESS FOR SMALL & HOME OFFICE

Initially we will require a dimensioned sketch or plan of your office, along with the look you would like to achieve and your preferred style of furniture. Our CAD department will then produce a 2D drawing. If you do not have a sketch or plan of your office, then a site survey will be offered.

# BOARDROOM

Choose from the wide range of traditional, modern or contemporary conference and boardroom layouts. We offer boardroom tables & furniture in a range of styles to suit all budgets and environments.

# GENERAL DESKING

As with changing times come changing desks and work areas. Slim, stylish and colourful desks now replace the old large dull desks of the past. A great range of sizes ensure perfect fit for your office space, ideal for large or small teams. From bench desking to individual single desks all styles are accommodated within the vast range of products available in our portfolio.

# HEIGHT ADJUSTABLE DESKING

With the change in desk specifications sit / stand desks are now very popular where the work environment allows for work to be done in a more ergonomic fashion. Very popular in Europe these desks are becoming more widely used in Irish offices.

# BENCH DESKING

These are reconfigurable bench desk systems for hot desking open plan office environments. They are available in a wide range of shapes and sizes to suit all styles of open plan offices.

# EXECUTIVE DESKING

Work in style and comfort. Executives and managers who sit at their desks for long periods need working space that provides comfort whilst at the same time playing a role in the décor of the office. Choose from a wide range of styles, from modern glass topped tables to the more traditional wood finished tables. Regardless of your budget we are confident that we can find the best executive desks to suit you without sacrificing quality or style.

# TRAINING ROOM

Classroom & Training Room Furniture - whatever your educational environment we have a layout to suit.  
We offer practical solutions which can help to maximise your working space

Training rooms require furniture that facilitates learning and keeps employees and guests comfortable. Hold better meetings and training sessions with great training room tables and chairs.

# RECEPTIONS

Give the very best first impression with our comprehensive ranges of reception desks, counters and chairs. We have a design to suit every corporate image and budget. You will be spoiled for choice with our many different designs with variations of veneers and finishes, combined with a full range of lighting and glass features that will boost the image of your Company.

# STORAGE

We offer wooden and metal drawer units and storage cabinets in a range of sizes and flexible solutions. Use our products to tidy-up your office, create or make better use of existing space.

# ACOUSTICS

Staff working in an open plan office will be familiar with the distraction of colleague's conversations and phone calls. Wall Panels can be used to effectively reduce sound reflections on side walls and cubicles in open office floorplans. Fabric-Wrapped Panels offer a wide variety of colour choices and size options.

# CANTEEN

Furniture performs an important function in the office canteen area. It needs to be durable enough to withstand the demands of a busy, often messy environment, but also needs to enable visitors to relax, unwind and converse at leisure. Additionally, the canteen needs to represent your brand in the best possible light.

# SCREENS

People who work in open plan offices get frustrated with a lack of privacy. Our extensive range of screens and partitions not only provide a good degree of privacy but also the finishing touches and character of colour to office furniture. Desktop screens help employees to focus better on their work by reducing the distracting and irritating sounds of telephones and computers. Free standing floor screens create visual, physical and acoustic barriers in any workplace by separating part of the office into teams and groups or creating quiet zones and breakout areas in open plan spaces.

FULL RANGE OF COLOURS AVAILABLE

# SEATING

People who sit at their desks for long periods need seating that provides support to the whole body whilst at the same time playing a role in the décor of the office. Our range of chairs are comfortable, dynamic, elegant and suitable for the modern professional who may require a head rest, adjustable heights and arms to work in style and comfort.

Working in an office typically involves spending a great deal of time sitting in an office chair - a position that adds stress to the structures in the spine. Therefore, to avoid developing or compounding back problems, it's important to have an office chair that's ergonomic and that supports the lower back and promotes good posture.

# SOFT SEATING

Create relaxed working environments where people can go for some time away from their desks, to meet and collaborate or to work without distractions. Soft office seating offers a variety of uses and can be situated in various locations. Choose from our different seating models which are all available in high quality wool fabrics or leathers.

## FULL RANGE OF COLOURS AVAILABLE

# POD SEATING

Many open office spaces don't have built in meeting areas or collaboration areas and the breakout area has become the contemporary area for both casual and formal meetups. Office pods have become an important element to many open plan offices as both a meeting area and an area for consultation. This is a feature that has become more and more popular in many companies.
